

# A Paranormal Investigation like no other!

## Ghost Busters of Australia

### Ghost Busters with a Twist!

I had the honour of being invited to a Ghost Busters of Australia Ghost Investigation! Held by Salubrious Events, this special two part, annual investigation and conference truly was an incredible experience.

#### The 'Ghost Investigation'

A Spirit Investigation like no other, held at Mount Martha Community House on the stunning Mornington Peninsula made for a chilling night out. Joyce and her team, comprised of Neuroscientist and Parapsychologist Dr. Vladimir Dubaj and Psychic Mediums Roquelle Frances and Brett Farrell led a series of discussions about spirituality, 'ghosts' and the nature of existence beyond life as we know it.

The restricted group size added a degree of intimacy and honesty to discussions, as group members shared their individual experiences and motivations for attending the investigation.

It was both intriguing and awe inspiring as the Psychic Mediums created a safe, open and trustful space to discuss all things ghost.

After a short meditation to allow guests to safely experience 'spirit' and in a now far more relaxed state, the group was invited to explore the historically significant location. This included tips and guidance on how to 'tune in' to the spirits that reside there. Encouraged to stop, close our eyes and focus on what may be in the room was unlike anything I have experienced.

A further guided tour of the location and a trigger object-based investigation later, left me with no doubt of the existence of lingering souls at this magnificent site.

It certainly was a 'third eye' opening experience and like no other tour I have ever seen.

#### Annual Ghost Busters Conference

Despite a last minute change in location due Covid-19 and all its social distancing joys, the Ghost Busters online Conference was a success!

Equally as intriguing and engaging, the speakers were able to make available insider insights of the spiritual and paranormal alike.

Invited to ask questions at the end of each topic, made the experience incredibly informative.

Its ability to be presented online actually allowed for otherwise more hesitant individuals to ask questions from the security of their keyboard.

In conclusion, both parts 1 and 2 of the Salubrious Events special, made for not one, but two incredibly different nights.

Well worth a revisit, now offering online events to keep us engaged during these tricky times, check them out on:
